What are my choices for health insurance?

Nebraska Medicaid provides health services to certain low income persons including those who are aged, blind, disabled, children aged 18 and younger, pregnant women and others.

CHIP (Children’s Health Insurance Program) extends Medicaid health services to children ages 18 and younger with no insurance.

Health Insurance Marketplace connects Nebraskans to affordable, quality health insurance plans and provides financial assistance to those who are eligible.

Is Medicaid/CHIP for me?

Medicaid or CHIP might be for you if you meet the income requirements and other requirements:

- You are under 19 years old.
- You are pregnant.
- You are aged (65 or over) or have been found disabled by Social Security.
- You are the parent, or caretaker relative, of a child under 19 years old.
- You are a citizen or lawfully present in the United States.
- You are a former foster care youth who has aged out of the system (under the age of 26).

Note: Some women, regardless of their citizenship status, may receive prenatal care for their unborn children through 599 CHIP.

Am I eligible?

Eligibility depends on the program, household size and how much money you make (see chart). For example:

- A pregnant woman in a household of three may be eligible if their income is less than \$3,259 a month.
- A child under age 19 in a family of three may be eligible if the household makes less than \$3,578 a month.
- Parents of children may be eligible if they make less than \$974 a month as a family of three.

Monthly Income Eligibility

To qualify for low or no-cost health insurance, you must meet certain eligibility requirements. Use the chart below to find your household size and monthly income. If you make less than that amount, you or your children may be eligible for Medicaid, CHIP, or the Marketplace.
