

Do you fall into the Coverage Gap?

WE WANT TO HEAR FROM YOU.

Because Nebraska has not expanded its Medicaid program under the Affordable Care Act, a health insurance coverage gap has been created.

If you make less than 100% of the Federal Poverty Level, you do not qualify for tax credits through the Marketplace and may not be able to afford private insurance. You may also be ineligible for current Medicaid (if you are not a child, pregnant woman, aged, blind, or disabled, low income parent, or don't meet the other income and eligibility guidelines).

Can't afford Health Insurance? CONTACT US.
